# AssetMinder®

impact

Where sustainability meets profitability

ADDRESS THE DUAL CHALLENGE OF SPIRALLING ENERGY COSTS COUPLED WITH YOUR SUSTAINABILITY GOALS

AssetMinder® Impact is an industry leading machine agnostic solution for energy monitoring, used to identify energy savings for all your utilities and supports in ISO50001 compliance as well as your sustainability goals.

YOUR APPROACH TO ENERGY MONITORING HAS A LARGE IMPACT ON YOUR BOTTOM LINE…

74%
Typical facility consumption is Natural Gas and Electricity

200%+ increase in electricity prices over then next 12 months

300%+ increase in gas prices over then next 12 months

Increase your benefits by nearly 300% offsetting the price rises

---

RAPIDLY DEPLOY AND REDUCE ENERGY COSTS BY UP TO 12%

AssetMinder® gets you up and running fast, without the need for large cap-ex outlay or complex changes changes to your current equipment and infrastructure.

AssetMinder® Impact captures energy usage from existing utility systems or from retro-fitted meters to provide insights to reduce energy consumption across your facilities

SEE THE IMPACT

DATA FROM DAY ONE
Gain insights into your energy usage and costs from day one

TOTAL VISIBILITY
See every locations data in a single dashboard

REAL-TIME ALERTS
Get alerted when your energy usage trend changes

MEASURE ALL UTILITIES
See your utility usage and performance, beyond electricity

SUSTAINABILITY GOALS
Understand your carbon emission output across your facilities

AssetMinder®

Why AssetMinder® Impact?

Support ISO50001 Compliance	Monitor all your energy and utilities	See across your current systems	Energy data for all who need it	Financial impact calculated

SUPPORT ISO50001 COMPLIANCE

- Understand your energy usage through real-time data analysis and key performance indicators
- See all your assets, from the factory to the field, in a single, configurable solution
- Track your improvements over time and report on the results
- Use your data to support compliance towards other sustainability goals and KPIs

MONITOR ALL YOUR ENERGY AND UTILITIES

- See energy usage from all aspects of Water, Air, Gas, Electricity and Steam (WAGES)
- Identify potential leaks and waste as soon as they happen
- Receive insights into what steps to take once problems arise
- Close loop the remedial actions and track improvements

SEE ACROSS YOUR CURRENT SYSTEMS

- Agnostic across all machines, meters and vendors
- Maximise use and impact of current metering infrastructure
- Single pane of glass overview of all metering operations
- Future-proof your plans through seamless additions of new metering operations to increase fidelity

ENERGY DATA FOR ALL WHO NEED IT

- Information given context to the person who needs it
- Gain visibility, monitor and report any of your utilities at all levels from product > asset > factory > all your facilities
- Work with data that intelligently reacts with the external variables (seasonality conditions, operational events)
- Reduce or eliminate the need for external electrical maintenance specialists

FINANCIAL IMPACT CALCULATED

- Align energy usage and productivity to better determine value created (energy/SKU)
- Financial analysis across all of WAGES
- Cross reference data with all variables
- Receive custom alerts based on preset targets
